BRITISH MUSEUM ELECTROS OF SCARCE ANCIENT COINS

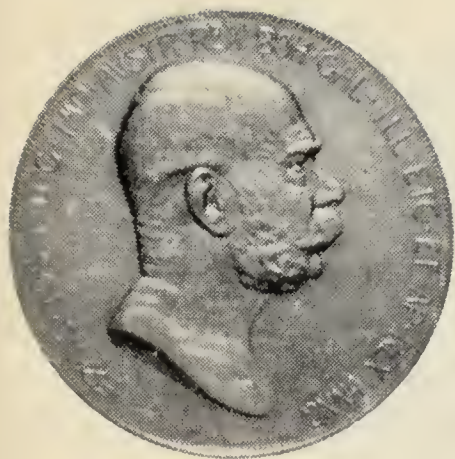

The following 130 lots consist of the finest known copies of the scarcest Ancient coins in the British Museum. Struck in the early part of the 20th century they are exact in every detail with the legitimate coin. All are in gold or silver and are, naturally, bright and uncirculated. Each coin comes in TWO PARTS; that is, obverse with blank reverse, and reverse with blank obverse and make ideal study pieces. Since every collector has his own idea of the value of these pieces, we have not placed any estimates on them. All are Greek coins, and all are pictured in Barclay V. Head's book, "Coins of the Ancients".

END OF SALE — THANK YOU

DON'T BID IN THE DARK

If buying at auction is new to you

If you are unsure of what to bid

If your bids are generally unsuccessful

If you would like advice in bidding

You can take much of the guessing out of bidding at auction. We'll be happy to place our sixty-seven years of auction experience at your service, by supplying our estimates of the probable realizations of the lots in which you are interested. Simply send us a list of these lot numbers (leaving space for us to insert our valuations), and enclose a stamped, self-addressed envelope. Our reply will be forwarded promptly. If time is short, call us for this information. OF COURSE, HOW MUCH YOU BID, OR WHETHER YOU BID AT ALL, IS UP TO YOU.

Naturally, using our estimates doesn't mean that you will obtain every lot on which you bid. But you will be in the ball park, and should obtain a fair proportion of your bids, and at prices consistent with current market values.
